INDUSTRIAL SECTORS

We operate in the following sectors:

- The Pharmaceutical Industry
- The Chemical Industry
- The Cosmetic Industry
- The Aerospace Industry
- The Plastic Manufacturing and Processing Industry
- Work in Hydroelectric, Thermal, and Nuclear Power Plants
- Wind Farms
- The Handling and Storage Industry
- Special Assemblies
- Special Access (Access in Silos, Tanks, Hard-to-Reach Installations)
- The Railway Industry
- The Automotive Industry

OUR PRODUCTS

The most common ones:

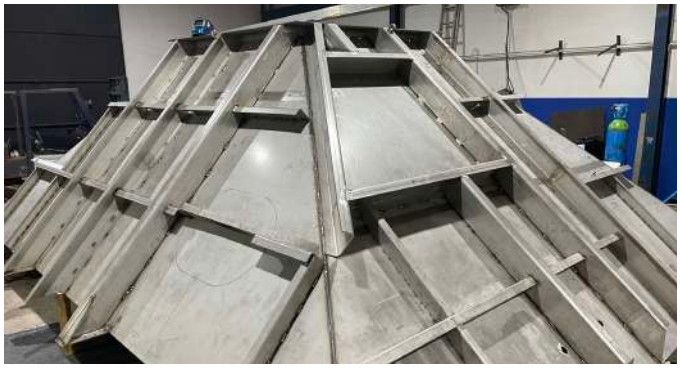

- Structures
- Machinery
- Tanks
- Pressure Vessels
- Mixers
- Reactors
- Coils
- Heat Exchangers
- Boilers
- Pipelines
- Piping
- Tanks
- Metal Furniture
- Conveyors
- Conveyor Belts
- Containers

BOILERMAKING, METAL CONSTRUCTIONS, ASSEMBLIES, AND INDUSTRIAL MAINTENANCE

At ECI, we manufacture all types of special metal constructions and unique pieces required by any industrial sector, working with all kinds of metallic materials (Carbon Steel, Stainless Steel – of any alloy –, Aluminum, Copper, Brass, etc.).

We work on clients' projects supervised by our team, or alternatively, we can handle the whole process ourselves . Our products undergo internal quality control certified by ISO 9001 (TÜV). ECI holds the EN-1090 EX-3 certification for metal construction in Carbon Steel, Stainless Steel, and Aluminum.

CUSTOM DESIGN OF METAL CONSTRUCTION PARTS

We design custom-made parts and assemblies, with machinery for entire installations. Our process includes everything from 3D (and 2D) design to project execution and manufacturing, covering various production stages, including prototype manufacturing, pre-series and small production runs, or simply unique parts.

SPECIAL PROJECTS

At ECI, we design and manufacture components and parts for specialized tasks and activities. In the fields of boilermaking, mechanical construction, and on-site assembly, we carry out projects tailored to our clients' needs, regardless of the industrial sector.

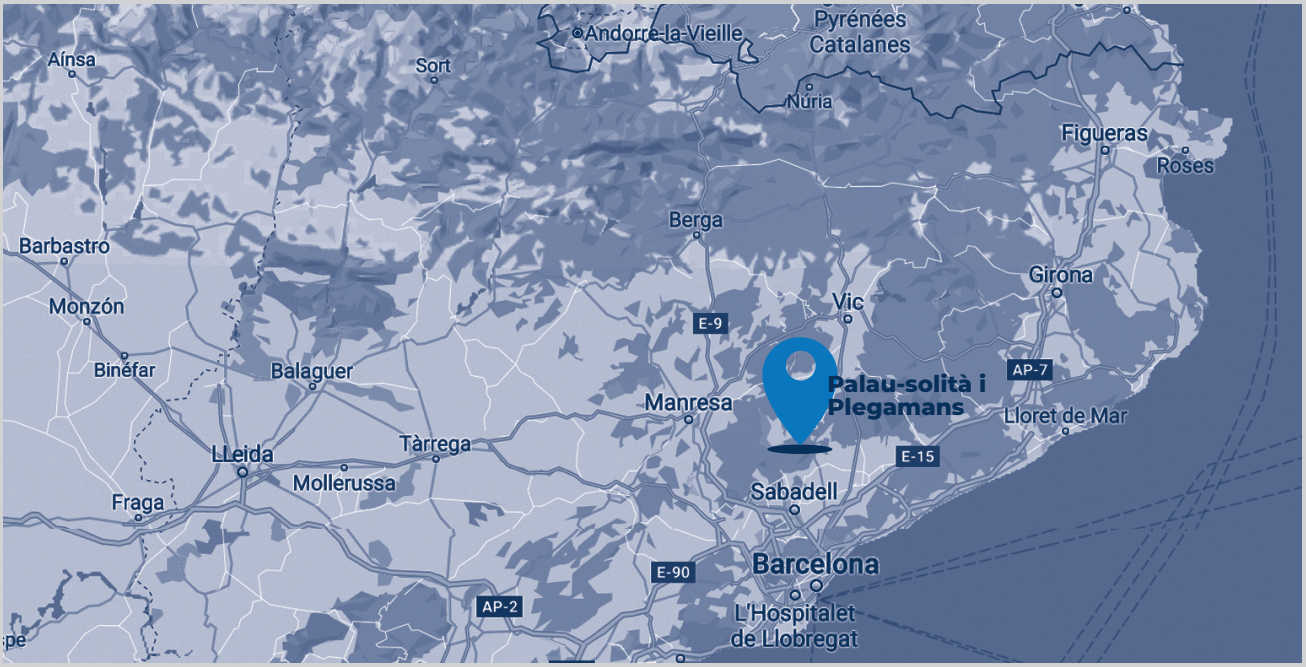

ECI is a registered company, certified UNE-EN-ISO 9001-2015 and EN-1090 EX-3. Upon request, we can subcontract project and work supervision to external certifying bodies such as TÜV, Applus, SGS (for welding projects, pressure vessels, etc.), Lloyd's, Bureau Veritas, etc. We provide our clients with our facilities, machinery, and over 60 years of experience to meet market demands.

LOCATION

Located 20 km from Barcelona, ECI offers its expertise and resources to carry out projects throughout Spain, Europe as well as worldwide (North America, South America, Asia, Australia, Africa).

With more than 60 years of experience, ECI is synonymous with quality and reliability, recognized and endorsed by our numerous international clients.

Throughout our long professional trajectory, we have successfully carried out countless projects for major international companies.
